

STRATEGY

The objective of the subfund is to ensure balanced growth of the assets of the subfund by investing at least 85 percent of its net assets in the investment units of Class I of the fund Artea Europe and Baltic Bond Subfund (hereinafter – the Master Fund) of the umbrella investment fund Artea Fund intended for institutional investors established in the Grand Duchy of Luxembourg. This way, the subfund will operate as a feeder subfund. In its turn, the Master Fund invests up to 100 percent of its assets in government and corporate debt securities in Emerging Europe. Recommended investment term – minimum 1 - 2 years.

FUND MANAGER COMMENT

European bond market experienced a positive month, thus Artea Europe and Baltic Bond subfund returned 0.6%, and slightly underperformed the benchmark which returned 1.0%.

It was election season in Central and Eastern Europe, with two largest countries in the region holding presidential elections. Romania conducted a rerun of its presidential election after the Constitutional Court annulled the 2024 results due to alleged Russian interference. Pro-European Independent candidate Nicușor Dan won the presidency with 53.6% of the vote, defeating George Simion of the far-right AUR party. The result was met very positively by investors as 10-year government yield contracted from around 7% to 6.2-6.3% level. First round of presidential elections was also held in Poland, with conservative candidate Karol Nawrocki and centrist Rafal Trzaskowski passing to the 2nd round. The run-off is projected to be extremely close according to the polls. Corporate spreads in Europe continued tightening, especially in high-yield segment, and are now close to pre-April tariff fear lows.

The Fund entered several new positions during the month. First of all, we participated in primary market issue of Bulgarian electricity distributor Eastern European Energy Company (EEEC) which issued their inaugural bond at 6.5% yield. Also, we participated in a new issue of Akropolis, which refinanced its 2026 bond early by issuing a 2030 bond at 6.0% yield. Both of these bonds have already performed really well in the secondary market. We also took profit in one position – PKN Orlen 2030 bonds. While the fundamentals of the company remain strong, yield significantly contracted and the bond no longer offered pick-up to Euro IG benchmark. Overall, the fund maintains lower interest rate sensitivity than the benchmark (3.2 and 4.4 duration, respectively), while providing higher yield to maturity (5.3% and 4.9%, respectively) and weighted average investment grade rating.

**Standard deviation is used to measure risk. Standard deviation is an indicator that measures how strongly fund's daily return deviates from its mean. The lower the standard deviation the lower the fund's risk. The standard deviation value corresponds to the period shown in the historical returns graph.*

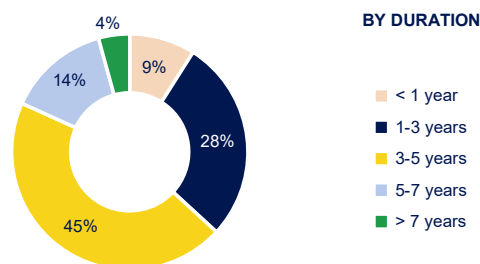

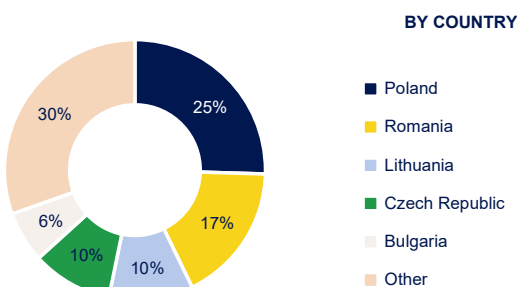

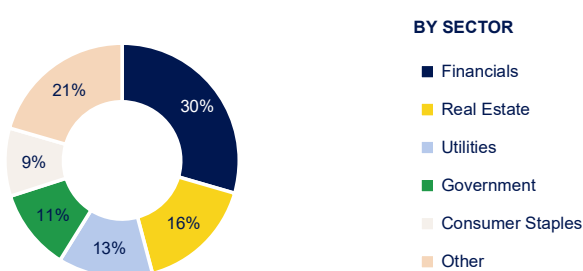

***Sharpe ratio measures the performance of an investment compared to a risk-free asset, after adjusting for its risk. The greater a portfolio's Sharpe ratio, the better its risk-adjusted performance. Sharpe ratio value corresponds to the period shown in the historical returns graph.*

****Benchmark index (since 30 November 2023):*

The Fund does not have exposure to Russian and Belarusian bonds

REASONS TO INVEST

- Combination of only hard currency (EUR or USD) sovereign and corporate debt ensures attractive yield, while limited credit and duration risk provides for low volatility.
- Fund maintains average investment grade credit rating. Lower government debt levels – Central and Eastern Europe 52%, Eurozone 88% (as of the end of Q2 2024).
- Active share of over 80% (creating value through off-benchmark picks, participation in primary issues, inefficiencies in the market).
- Historical Sharpe ratio exceeding 1 places the fund among the best Emerging Europe bond funds in the world by risk-adjusted returns.
